2016
ITNAC

International Telecommunication Networks And Applications Conference
7-9 December 2016 – Dunedin

Sponsorship Invitation

Serving as one of the leading research forums in Australasia for researchers and engineers to exchange their research outcome and innovative ideas, the International Telecommunication Networks and Applications Conference (ITNAC) will be held in Dunedin, arguably the most scenic city in New Zealand and home to the prestigious University of Otago, 7-9 December 2016.

ITNAC'16 seeks to address and capture highly original and state-of-the-art research from academia, industry and standardization bodies. Novel contributions will be presented in the form of keynote speeches by international experts, peer-reviewed technical papers, and posters. We also welcome contributions to industrial tracks and product demonstration / expo. ITNAC 2016 provides a good opportunity to position your brand and network with academic colleagues, student talents, and professionals from New Zealand and the APAC region.

- Mobile and wireless networks
- Internet of Things
- Performance modeling and optimization
- Internet management
- Software defined networking
- Cognitive and cooperative networking

- 4G/5G networks
- Optical networking
- Cloud computing
- Internet technologies
- Network applications
- Cyber-security and privacy

The conference proceedings will be published through the IEEE Computer Society Digital Library.

We welcome your participation in this exciting event and your contribution to the research forum in a variety of forms, including presentations, expo, and panel discussion. There remain some sponsorship opportunities available to support and contribute to this event in a significant way while having your brand advertised on our website, in the conference programme and the proceedings, and on the conference, attracting potential collaborators and young talents alike.

For more information, please visit the ITNAC'16 conference website at www.itnac.org.au
